TOP TECHNICAL PROJECTS

Full-Stack Web Developer *2026*
E-Commerce for Small-Scale Store (XAMPP)

- Built a full-stack e-commerce web application using XAMPP deployed in a free hosting service. Features include authentication, adding to cart, place order, rate review, order tracking, vouchers, admin management, and payment implementation. Using manual payment method due to lack of professional business documents.

Full-Stack Developer *2025 - 2026*
Salon Management System (Mobile App + Web Platform)

- Developed a full-stack mobile application and customer-facing web platform for MBeautyQueen Salon, enabling appointment booking, real-time messaging with automated response, service listings, customer feedback, and business information management. Built as a client-based mini capstone project.

Full-Stack Web Developer *2024*
Journal Web Application (MERN Stack)

- Built a full-stack journaling web application using MongoDB, Express.js, React, and Node.js with features for secure user authentication, user profile, and personal entry management.
